Design tool!**

Canva's USP

① Templates Library

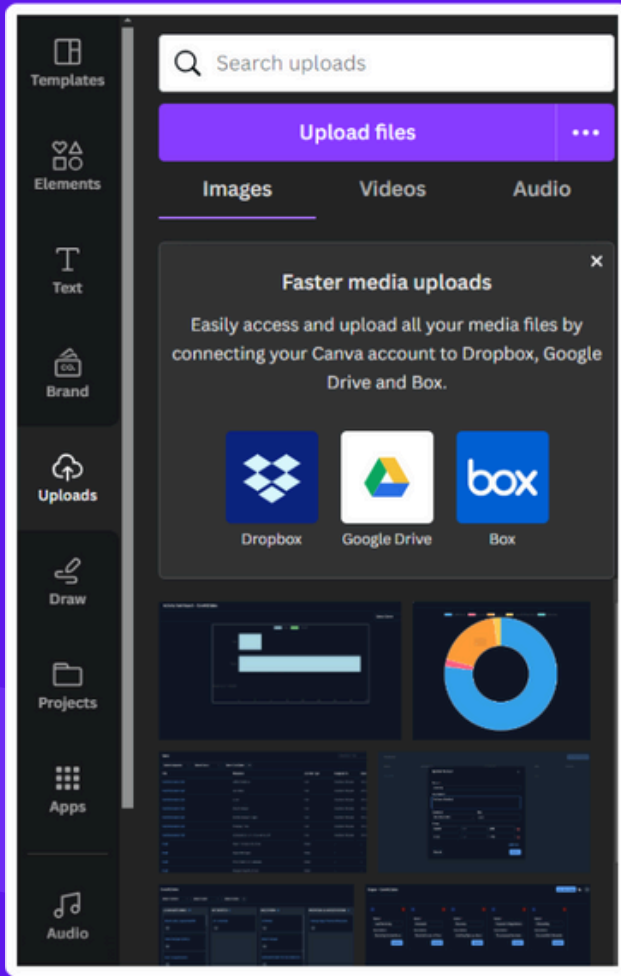

Everything you need to get started!

- Curated designs made by Canva Creators
- Vast template library for all graphic types
- Easy Customization

Canva's USP

2 Media Library

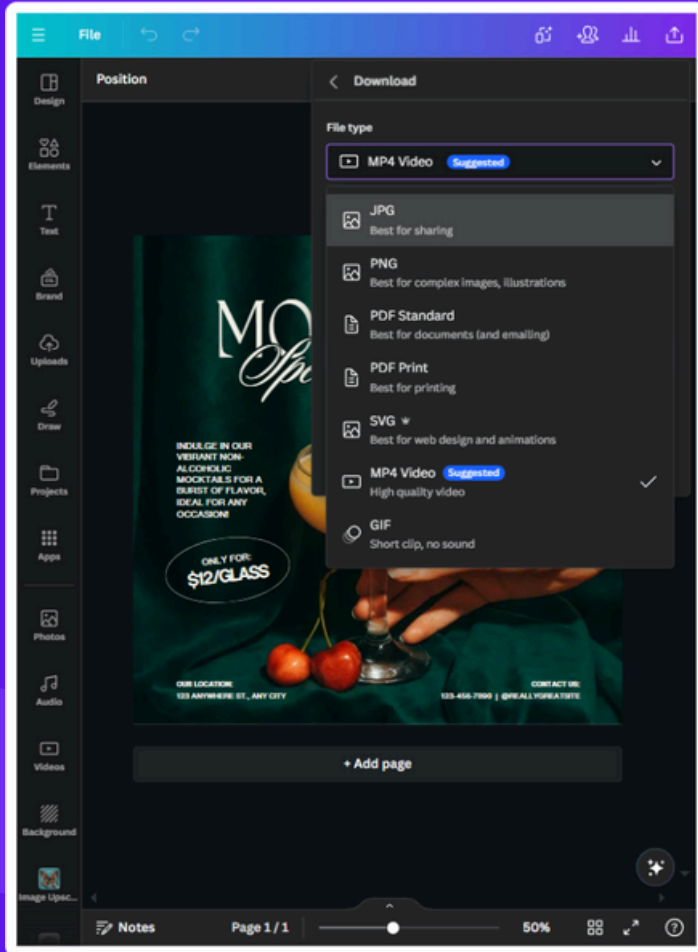

Import & reuse everything online!

- Import everything such as image, video, PDF, video and audio in almost all formats
- Reuse all media files in all types of designs
- Accessible everywhere on any device

Canva's USP

3 Multiple Export Formats

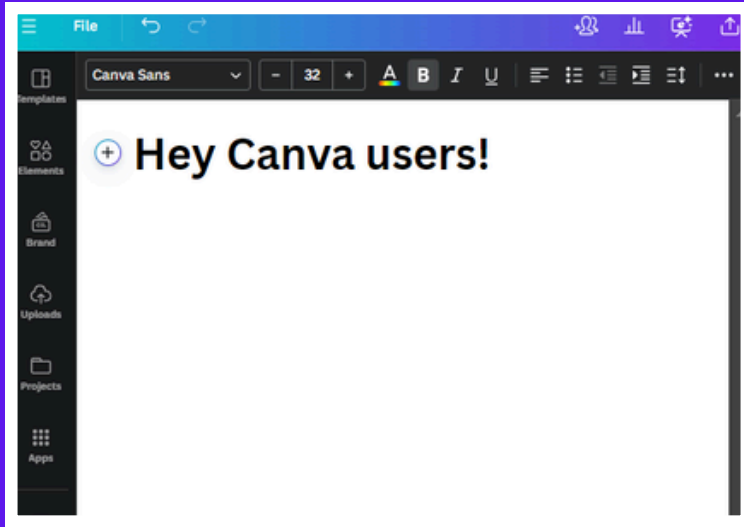

Download as a video, image or just share!

- Canva offers multiple export options like mp4, PNG, JPG, PDF, SVG, PPTX
- Along with plenty of export options, Canva enables seamless sharing of a design with just a link

Suggestions

Improve Text Formatting

- Though Canva is promoting their Docs feature, I don't find it effective. Since I'm using Canva for almost all design+office work, one thing Canva should improve is Text Formatting.
- Basic essential features like subscripts, and superscripts are needed.

What are your suggestions for Canva?
