App Metrics

	User Growth	User Engagement	User Drop Out	Cash Flow
Top Priority	Installs	MAU/DAU	Weekly churn rate	Weekly revenue Commision on products
Medium Priority	Number of users	Price compares	Avg user lifetime	Delivery charges
Low Priority	App size, installation time			

North Star Metric

Number of order placed
which is directly related to revenue generated

Unfair Advantage

Differentiating the product

- Grocery items are mostly likely to buy from same Kirana store most of the times
- Since the customer is buying from a known Kirana store, convincing to buy online is easier
- Creates a network of local Kirana stores
- A monthly one-time payment option allows a smooth buying experience
- Monthly grocery tracker help customer to keep eye on expenses and purchases
- Effective WhatsApp integration to help vendors share new products and share bills

Competing with alternatives

- Smooth onboarding process for vendors
- Onboarding bonus for vendors
- Attractive discount on initial purchases
- Referral bonus for customers and vendors

Challenges/Risks

- Established grocery app players like Amazon, Groffers, Dunzo, etc.
- Huge discount on occasional activities such as The Big Billion Days on Flipkart, Great Indian Festival on Amazon
- Connecting with local vendors is a difficult task
- Maintaining delivery punctuality in the local area is difficult
- Additional marketing costs
