SUNIL RAO

Graphic Designer

Interesting work experiences.

Sunil is a freelance graphics designer, who works at his own design studio. While designing the content he loves to listen to music. He is fond of music Indian music and loves to explore new songs.

Pain Points:

His current playlist is filled with repeated songs. He wants to discover new songs and genres.

RANI PREET

Graphic Designer

Interesting work experiences.

Rani is a web developer who works at an IT MNC. She is in love with 90's songs, the good old songs.

Pain Points:

Currently, she can't search and find each music she wants to listen to. She needs a personalised playlist made for her which can help her discover 90's those old nostalgic songs.

Recommendations based on these three methods

Google Play Music

Music Preferences

YouTube History

01

Google's music streaming service

Recommendations are based on previous preferences on music app

02

Onboarding taste-profile form

Categorized based on language, artists and suggests similar songs

03

YouTube video watch history

Based on videos liked and playlists created on YouTube.

Small Factors

Recommendations on your Home tab are influenced by everything from your listening history, to the device you're using, to what's happening in the world around you (e.g. New Release Friday, Memorial Day, etc.) to your current activity, place and even the weather (if you've opted in to location permissions).

If you're new to YouTube Music, your recommendations should improve as you listen and like (thumbs up) or dislike (thumbs down) different music. You can also try searching for music and the app will learn as you listen to your favorite songs!

User Reviews

 Davie Maan (dsnypa) 

★★★★★ September 20, 2022

I really enjoy being able to take my music collection with me everywhere I go, making playlists, and sharing with friends. Also starting a radio station from a song I really like and discovering similar songs and artists I like to add to my list. It is now less about how popular the artists is and more about whether it is a good song or not. Discovered new artists that I wouldn't have known before. Got the paid version as I think ads ruin my listening experience but they got bills to pay to.

★☆☆☆☆ September 3, 2022

Feel like I wasted my money on this app. Being such a big enterprise you guys failed to deliver the app 100%. I have waited almost a year for better updates. where you could solve the problems with repeating song loop even in the shuffle mode. And song recommendations are not up to the point. Interface is bit difficult to use when compared with other apps.

Since YT Music recommendations are based on YouTube watch history as well, it feels the recommendations are more biased on what being watch on YouTube.

North Star Metric

User feedback per recommended song

eg.like/dislike/skip behaviour

Other Metrics

The average length of recommended songs played/recommended playlist

Number of times the recommended song played by the user

Number of times My Mix playlist played by user

Songs recommended based on moods sections are not personalised on user preferences. It feels like they are forced to use to play.
